

21 June 1973

Note for Mr. Colby

Bill,

25X1
[redacted] has asked for a few minutes (30) of your time to outline the product of his evaluation methodologies. Recently a decision was made by IC to discontinue this kind of exploration, particularly in light of heavy investment of time involved. The Director asked [redacted] to review it independently and this was done.

I believe you'll find Max's focus an intriguing one. [redacted] of FY 1974 funds into similar research for the GDIP. How practical all this will be remains to be seen, but this kind of evaluation research has in the past received some support from [redacted] and DIA is feeding on that bin.
